

# RAJEEV KHATI

## Frontend Developer (Aspiring Fullstack) – 2+ years' experience

Phone: (+91) 8976630817 | Email: [rajeevkhati5312@gmail.com](mailto:rajeevkhati5312@gmail.com) | GitHub: <https://github.com/RajeevKhati>

### SUMMARY/OBJECTIVE

Dedicated and motivated professional with 2+ years of experience in **web + mobile development**, specializing in **React**. Complemented by a strong foundation in backend technologies, including **Express and NestJS**. **Aspiring to become a full stack developer** to leverage comprehensive skills in both frontend and backend development.

### WORK EXPERIENCE

#### Nagarro (Aug 2021 – present)

##### ReactJs + Typescript | Client - Automobile Giant | Sept 2022 – Present

- Created UI components, hooks, pages on a React.js monorepo by NX workspace along with unit testcases.
- Implemented micro frontend using webpack module federation.
- Worked on Landing page which handled user authentication using AWS Cognito pool.
- Optimized excel upload/download feature which reduced 5 PDs of work to 1 PD.
- Part of the core team and contributed to create the **app from scratch**.

**Tools and Libraries Used:** Webpack, Vite, Tailwind CSS, i18next (for internationalization), Tanstack query, Jotai, react-hook-form, Storybook, jest, vitest, react-testing-library, ESLint, husky.

**Cloud Provider and usage:** AWS – CodeArtifacts, CodeCommit(git), S3, CloudFront.

##### React Native (in JavaScript) | Client - Pharma Giant | Dec 2021 – Sept 2022 | App - [Medgami](#)

- Created efficient and responsive React components & pages for mobile supporting both iOS and Android.
- Worked on “create profile” page where user can create, update, delete profile picture with various input fields and api integration. Implemented utility for the same to select, upload and set profile pictures.
- Integrated Sonar to correct bugs, vulnerabilities, and code smells in the code.

**Tools and Libraries Used:** redux, redux-saga, react-hook-form, axios, styled-components, flipper (to visualize state management), ESLint.

##### Training | Aug 2021 – Dec 2021

- Trained in multiple technologies like Asp.net, Angular, Node.js, ExpressJS. OOPs, Design Patterns.

### SKILLS

**Technologies** - ReactJs, React Native, Node.js.

**Languages, Tools & Libraries** - Typescript, JavaScript, Webpack, Vite, NX monorepo, Micro-frontends, i18next, Redux, Recoil, Jotai, Tailwind CSS.

**Familiarity** - NextJS, SSR, Angular, PWA, ExpressJS, NestJS, Prisma, MongoDB, PostgreSQL, Core Java, C#.

### PROJECTS

#### CHAIPUCCINO

##### React Native | Firebase | Android App | [Chaipuccino App](#) - [Github](#)

- A Tea making startup had to do complex calculations of ingredients to make tea daily.
- Calculations like milk and water quantity to make certain quantity of tea, right proportions of ingredients to maintain consistent taste etc.
- This app solved their problem where they can provide necessary inputs to make tea.
- Features: -
  1. Home page consists of desired quantity of tea, as per which milk, water and another ingredients quantity are calculated based on base recipe added by User.
  2. A Base recipe page has calculations of ingredients per liter of tea, it can be updated anytime and it's connected to **Firestore**, So a single update will reflect in every user's phone.
  3. A **Background timer** is added to track the heating time of milk and water.
  4. An **alarm sound** to notify user to stop the heating for milk and water.

#### TIMESHEET MANAGER

##### ReactJS | Firebase | PWA | [Timesheet Manager App](#) - [Github](#)

- Employees can enter leave or working hours, and the Manager can approve it.
- Employees can **upload** leave email **images** and manager can **download** it – Used **Firebase storage**.
- Employees can **sign up** with either **email & password** or they can login using **phone (OTP auth)** or **google account**.

### EDUCATION

Bachelors in engineering (Mechanical) – 70%
